NARAYANA RONGALI

Data Engineer

rongalisssnarayana@gmail.com | +91-6300094534 | linkedin.com/in/narayanarongali | Chennai, India

SUMMARY

Data Engineer with 3+ years of experience building and optimizing ETL/ELT pipelines, data warehouses, and order-generation and forecasting platforms for enterprise CPG and retail clients, including PepsiCo (Frito-Lay North America). Strong expertise in SQL Server, Azure Data Factory, Azure Databricks (PySpark), Azure Synapse, Python, and Power BI, with hands-on experience in data migration, performance tuning, CI/CD automation, and data quality validation in production pipelines. Databricks certified; two-time recognition award winner.

TECHNICAL SKILLS

Languages: Python, PySpark, SQL (T-SQL), pandas

Pipelines & Orchestration: Azure Data Factory, Azure Databricks, PySpark, Delta Lake, Auto Loader, Apache Airflow, ETL/ELT Development

Databases & Warehousing: MS SQL Server, Azure SQL Database, Azure Synapse Analytics, MySQL, Teradata, IBM DB2

Cloud & DevOps: Azure (ADF, Databricks, Synapse, Data Lake Storage Gen2, Blob Storage, Key Vault, Monitor), Azure DevOps, ARM Templates, Git

BI & Reporting: Power BI, Power BI Gateway, DAX

Other: Data Modeling (Star Schema, SCD Type 2), Medallion Architecture, Data Warehousing, Data Migration, Performance Tuning, Data Quality Validation, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Analyst - Data Engineering - LatentView Analytics

Sep 2023 - Present

Chennai, India | Client: PepsiCo (Frito-Lay North America) - CPO Order Generation & Forecasting

- Engineered an automated order-generation and forecasting platform for the PepsiCo FLNA CPO team covering Sam's Club, Walmart, and BJ's, using Azure Data Factory and Azure Databricks to produce daily orders across 1.2M+ store-item records, cutting the manual order cycle from ~4 hours to under 20 minutes.
- Built metadata-driven ADF pipelines (config-table driven, parameterized, trigger-scheduled) to ingest retailer inventory, sales, and delivery-schedule feeds from on-premises and file sources into ADLS Gen2, cutting new-retailer onboarding from ~2 weeks to ~3 days.
- Implemented a Bronze/Silver/Gold medallion architecture in Azure Databricks with PySpark and Delta Lake, using Auto Loader with schema evolution, UPC derivation, exception mapping, and deduplication, reducing duplicate and malformed records by 85%.
- Applied advanced PySpark optimization (broadcast joins, salting for skewed keys, adaptive query execution, date partitioning, OPTIMIZE and Z-ORDER) with incremental Delta MERGE loads, cutting nightly processing from ~3.5 hours to ~40 minutes (80%) and cluster cost by ~35%.
- Designed a star-schema dimensional model (inventory, order, and forecast fact tables; store, item, retailer, and date dimensions) with surrogate keys and SCD Type 2 history, improving Power BI report query performance by 55%.
- Built a PySpark data quality framework (null, range, referential integrity, and row-count reconciliation) across 25+ tables, with failures logged to Azure Monitor and alerted, reducing downstream data incidents by 45%.
- Secured Azure data workloads with Key Vault-backed secrets, managed identities, and RBAC on ADLS Gen2, and automated ADF, Databricks, and Synapse deployments with Azure DevOps CI/CD and ARM templates, cutting release time by 50%.
- Migrated on-premises SQL Server 2019 workloads to Azure SQL and Synapse, rebuilding stored procedures and views and tuning the forecast procedure from ~45 to ~6 minutes; improved Synapse query performance by 40%.
- Delivered retailer-scoped order and Daily Projected Forecast features in the internal React/Node.js ordering tool, resolving cross-retailer data defects to reach 99%+ order accuracy and cutting upload rework by 60% with row-level validation.
- Delivered 10+ Power BI dashboards across retail, finance, and CPG with automated Gateway refresh on Azure SQL Database, reducing manual reporting effort by 70%.

CERTIFICATIONS & AWARDS

Databricks Certified Data Engineer Professional 2026

Databricks Certified Generative AI Engineer Associate 2026

Spot Award - Going Above and Beyond | LatentView Analytics: high-impact delivery under tight deadlines.

Encore Award - Excellence in Customer Centricity | LatentView Analytics: strong client relationships and satisfaction.

EDUCATION

B.Tech in Chemical Engineering | *Indian Institute of Petroleum & Energy, Visakhapatnam, India* Aug 2019 - Apr 2023
